SESSION SHOT MAP

TRAINING NOTES

Focused on high-intensity catch-and-shoot drills from the corner and wings. Shooting mechanics stayed consistent despite fatigue in the final 10 minutes. Leg drive was excellent during the 3-point phase. Next session should prioritize off-the-dribble pull-ups to simulate late-clock scenarios.

 **Coach's Insight**

Your shooting percentage is 4% higher than your career average. The extra 15 minutes of warm-up seems to be paying off.
